

Breakfast Series: 9:30-11:00 a.m.

No Registration

September 19: Smart Home

Smart technology is one of the newest and hottest trends taking the world by storm. From voice-activated assistants that can control your home or office at your simple command to smart lights, plugs, thermostats and more that can learn your patterns and enact what you want even before you think about it. Learn about what these devices are, what they are capable of, and how easy they are to use and program.

October 17: Communication Via Satellite by NASA

Dale Force, Electronics Engineer at NASA Glenn Research Center, will guide us through understanding how satellites are used for communication.

November 14: Last 90 Years in Technology

Join us as we celebrate Rocky River Public Library's 90th Anniversary by reminiscing about technology over the past 90 years. This interactive session will help us rediscover where technology has grown (and shrunk) over time.

December 12: Smart Health Gadgets

From trackers that can save your life to a mobile EKG that can fit in your pocket to a device that can detect when you're stressed, technology has advanced tremendously, and it can be a great tool to help us get healthier and happier. Learn about what amazing health devices are available to you today and what they can do to help you understand your health and improve it.

A banner with a green and white background. The text "Find Out Fridays" is in a bold, dark green font, and "Online Events" is in a larger, italicized, dark green font below it. The background features abstract green and white lines.

Learn about popular websites and internet tools from your home:

- ◆ September 28 – *Old Time Radio*
- ◆ October 26 – *Windy.com*
- ◆ November 16 – *Baidu*

To connect to the online events, go to <https://livestream.com/rrpl> in your browser. For additional information, call the Training Department at Rocky River Public Library at (440) 333-7610 ext. 3754.
