1. Cut the iridescent stickers into any shape you want!
2. Arrange your iridescent sticker pieces.
3. Remove the backing and attach to the greeting card and envelope.
4. Share your creation on a special occasion or to celebrate the holiday season!

## COWAN & GLAZES

R. Guy Cowan experimented with glazes since he first came to Cleveland in 1908 as an instructor for East Technical High School. In 1911 a Plain Dealer article announced Cowan's major breakthrough as the first artist to develop an iridescent glaze for ceramics. The Cowan Pottery Studio became known for its innovative use of glazes and would later highlight metallic luster in many of its designs. Iridescent glazes remained popular throughout the years and were used by the Studio until its closure in 1931.
